

HTB PARTNERS LIST

An award winning accounting solution with the built-in flexibility you need to customize and modify your system. HTB specializes in module implementation, software installation, industry specific customization and database conversions.

Securely deliver and maintain applications and information to remote offices and contact centers. Remote office connectivity solutions enable application access from one centralized location, reducing the cost of provisioning branch offices individually. HTB's Citrix services cover needs analysis, consultation, installation and most importantly, ongoing support.

HTB provides corporations and small businesses with certified on-site printer repair services and upgraded printer parts. Our qualified technicians provide services that include printer repair, cleanings, original printer repair maintenance kits, fax, laser & Officejet repair, large format printer repair and factory printer warranty support.

We offer installation and customization of MAS 90 or MAS 200. It's broad selection of features includes accounting, financial reporting, distribution, manufacturing and e-business management. For businesses requiring higher performance data processing, MAS 200 uses the latest thin-client architecture to deliver high-speed performance across the internet or via a dial-up connection.

HTB's onsite IT Support has implemented Symantec products for our valuable clients. The Symantec Antivirus Corporate Edition provides scalable, cross-platform virus protection for workstations and network servers throughout the enterprise and the world's leading remote control solution, PcAnywhere. It's integrated tools make it easy for HTB's IT Support to resolve server and workstation problems remotely.

Our highly trained Cisco Certified staff has many years of experience implementing and configuring a wide range of network solutions, from traditional LAN switching to more sophisticated traffic management and data voice integration solutions.

HTB PARTNERS LIST

VONAGE

Using an existing high-speed Internet connection, Vonage technology enables anyone to make and receive phone calls worldwide with a touch-tone telephone. Offering quality phone service bundled with enhanced IP communications services, it's interactive communications portal is a gateway to advanced features only available through digital telephone service. As a Vonage affiliate, we offer an innovative, feature-rich and cost effective alternative to traditional telephony services.

Panasonic AVAYA

HTB offers a complete communications system control that is flexible and powerful, designed to streamline business communications and make a host of advanced features available to each extension in your business. From a Digital PBX System to the Advanced Hybrid Telephone Systems.

MCI

MCI owns the world's farthest reaching global network and spans more than 4,500 Points of Presence (POPs) throughout the world, with 3.2 million global dial modems and high-capacity connections to more than 96,000 lit buildings. The global IP network can circle the globe more than four times and MCI remains the most connected Internet backbone provider with the greatest number of Autonomous System network connections. We use MCI's Dedicated Solutions to suit your Internet access needs and support all of your mission-critical applications.

The Lucent VPN Firewall gives you peerless capabilities for delivering service-level assured advanced security, IP VPN, and QoS services to enterprises' regional and branch office sites. The VPN family Brick 80 and Brick 201 provide feature-rich, secure, virtual and private network solutions for both site-to-site and remote access environments. HTB will provide any desired level of expert solution planning, design, deployment, integration and product support.

HTB supports a full range of high-quality, easy-to-use and affordable voice and video communication endpoints plus video management software, web conferencing software, multi-network gateways, and multipoint conferencing and network access solutions. The worldwide leader in market share for voice and video conferencing, the company has developed The Polycom Office™, the world's only fully integrated, end-to-end video, voice, data and web collaboration solution.

BOScom develops and markets stand-alone, point-to-point VoIP migration solutions for business and alternate carriers. Marketed under the Bosanova brand, it's customer premise equipment products are designed for seamless and rapid integration into the existing network infrastructure. As a BOScom reseller, our goal is to maximize the benefits of VoIP technology at minimal cost and effort.

Microsoft®

HTB is more than a Windows network integrator. We focus on the entire suite of Microsoft Development Tools to bring you the best solutions within the Microsoft framework of products. We have an experienced staff of Microsoft Certified Network Engineers and Microsoft Certified Professionals who know how to unlock the full potential of Microsoft's products, support and services.

redhat

Mandrake Linux

Apart from the fact that it's freely distributed, Linux's functionality, adaptability and robustness has made it the main alternative for proprietary Unix and Microsoft operating systems. Whether it's Red Hat, SuSE or Mandrake, HTB can provide the distribution, installation and support.

Intuit

Whether it's Personal, Business or Accounting, HTB has the solution to manage your finances and taxes with confidence. Intuit's software for home offices and enterprises such as QuickBooks, Quicken, Quick Base and Turbo Tax will keep your entire business running smoothly, from your finances to your customers to your employees.

verizon
